The Way of Life

Among the thriving changes in the Thai Society, one occupation remains alive in the many corners of the Country..." The many street peddlers and closely cluttered store holders striving to make a staple out of the undying trade.

They go through the day with hard work and endurance, suppressing their emotions, just to make ends meet, but yet there is happiness which can be found in each of these characteristics. It is a kind of satisfaction and self-sufficiency from within which cannot be described with mere words. You can behold the lifestyles / emotions that run through the many faces of these peddlers through my paintbrush....."

Thank you

Oranuj Osatananda
