Concept

I have the inspiration from lady boys who have the career of dancer lady boys in the shows at the night time. They show their emotion and feeling on stage amazingly Which I can touch fully, even before going to show on stage, they put on facial makeup wig, costumes and ornaments which are in conflict with their large and strong bodies.

I realize that the real life has seriousness, endurance and happiness, so I put the life of these lady boys to express their emotion and feeling into my works by using the form of contemporary art work and I mix my characteristics into these works. World “lady boys” being slang for transvestites, transsexuals and cross dressers.
